

# Confronting Climate Change – from Science to Policy

**International Bachelor Summer School for Climate Change Research**  
**7–18 August 2023, Bern, Switzerland**  
6 ECTS-Points

The latest report published by the Intergovernmental Panel on Climate Change states that “climate change is clear” – a conclusion that was accepted and agreed upon by each participating government. This global and highly complex challenge can best be understood and addressed by adopting an interdisciplinary perspective.

The International Bachelor Summer School for Climate Change Research invites highly motivated bachelor students (semester 4 to 6) from different disciplines to participate in the course which is being held under the umbrella of Climate Change Research.
