

Hans Sigrist Symposium 2016

The Human Fingerprint on the Earth System

2 December 2016, 9:15-16:45
UniS, Schanzeneckstr. 1, 3012 Bern

Program

08:30-09:15	Coffee and Registration
09:15-09:20	Welcome and Opening
09:20-10:00	Ray S. Bradley , Climate System Research Center, University of Massachusetts Climate Variations and Forcing since Early Medieval Time, and our Return to the Dark Ages
10:00-10:40	Martin Claussen , Max Planck Institute for Meteorology, Hamburg Silvicultura oeconomica - Forests, Humans, and the Global Climate
10:40-11:10	Coffee
11:10-11:20	Norbert Trautmann , President, Hans Sigrist Foundation, University of Bern
11:20-12:00	Gabriele C. Hegerl , School of Geosciences, University of Edinburgh Detecting and Quantifying the Human Influence on the Climate System
12:00-13:30	Lunch Buffet, Foyer UniS
13:30-14:10	Erich M. Fischer , Institute for Atmospheric and Climate Science, ETH Zurich The Human Influence on Temperature and Precipitation Extremes
14:10-14:50	Simon Caney , Department of Politics & International Relations, University of Oxford Realizing Climate Justice: The Significance of Detection and Attribution
14:50-15:20	Coffee
15:20-16:00	Miranda Schreurs , Bavarian School of Public Policy, Technical University of Munich Low Carbon Energy Transitions: Comparing Approaches in Europe, China, and the US
16:00-16:40	Roda Verheyen , Günther Rechtsanwälte, Hamburg Detection and Attribution vs. Legal Causation – Problems of Scale and Standard of Proof – The Example of the Case Lliuya vs. RWE
16:40	Closing Remarks
